Adhered moisture, grease, and dirt on substrate must be cleaned thoroughly.3. The red, #18 yellow and #19 yellow should be used alone, don't use them to mix with other colored paints, if required, please use No.411~412 Acrylic Emulsion Paints to avoid color fading.4. The application must wait for 2 to 3 weeks until the walls were completely dry off and the moisture content under 12%, because the new constructed cement walls contain a lot of moisture and free alkaline substances that may reduce paint film performance and adhesion. After applying the primer, the topcoat can be applied.5. Avoid construction when it is rainy or atmospheric relative humidity is above 85RH, especially when the surface is wet, it must be completely dried; It can be applied only when the surface temperature is between 5°C ~ 40°C.
